## EUROPEAN SOLID WOOD WORK TOPS

FLOATING SHELVES AND KITCHEN FURNITURE

NATURAL, HEALTHY AND WARMLY INVITING

PERFECT FOR TODAY'S KITCHENS

  
CaféCountertops™

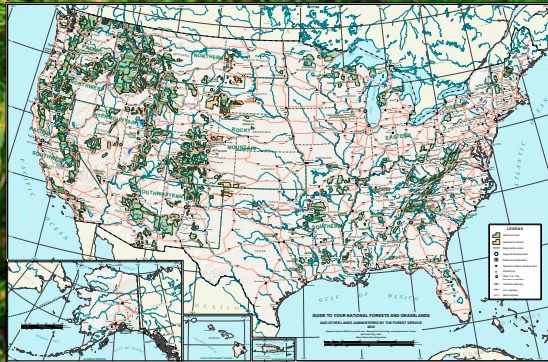

## TWO TREE COMMITMENT

CaféCountertops has made the commitment to plant **two trees** in America's National Forests for every order we receive.

We have partnered with organizations that plant trees across America to replace the many trees we lose annually to drought and wildfires.

**America's  
National  
Forests**

THE **ONLY** WOOD COUNTERTOP  
MADE IN AMERICA WHICH IS  
BOTH **FOOD-PREP-SAFE AND**  
**SUITABLE FOR SINK AREAS.**

Everyone else requires you to choose. Mineral oil finishes are not suitable for sink areas, while varnish-like coatings are not suitable for chopping and are difficult to repair if scratched. Why sacrifice functionality? CafeCountertops' Hand-Rubbed Luxury Oil Finish is perfect for food prep, excellent for sink areas, and easy to spot-repair if scratched.

COASTAL OAK EURO-PLANK

## BACTERIA DOESN'T STAND A CHANCE

Both of CafeCountertops' standard finishes are effectively antibacterial (the surface will attack and kill bacteria and viruses), and will help keep the kitchen a healthy and food-prep-friendly place.

**LEARN MORE HERE!**

## FINISH OPTIONS

### Hand-Rubbed LuxuryOil Finish

No other wood countertop finish delivers such an effective combination of food-prep-safety and easy, long term care. The rich luster of hand-rubbing showcases wood's natural beauty. Our proprietary Oil/Wax blend repels water without blocking wood's natural antibacterality. And, scratches can be easily spot-repaired in minutes. **Our standard finish — recommended for every application.**

### Super Bio-Coat

Antibacterial and maintenance free! Prior to Super Bio-Coat's introduction, no wood countertop maker could offer a coatings-type finish that was antibacterial. Scientific breakthroughs have allowed us to incorporate permanent microbe-killing components into this premium-grade urethane-based finish. However, as with all coatings-type finishes. Super Bio-Coat is difficult to repair if scratched

*"The greatest Wealth is Health" – Virgil*

## STANDARD WOODS

Colors for every mood; from light and airy, to rich midtones, to exotic and mysterious dark colors.

European Beech

European Oak\*

Mahogonay

Iroko (African Teak)

*Newly-fabricated Iroko has strong golden highlights which darken over time.*

Rustic Oak

Antiqued Oak\*

Black Beech

Grey Oak\*

Whitewash Oak\*

Coastal Oak\*

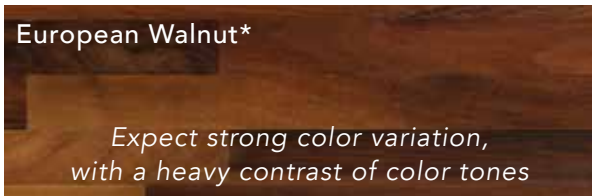

Chateau Oak\*

Biltmore Oak\*

European Walnut\*

*Expect strong color variation, with a heavy contrast of color tones*

Black Walnut\*

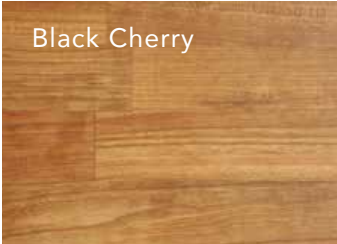

\*Available in 19mm and 26mm.

## OTHER WOODS

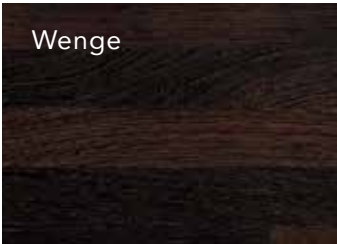

Hard Maple

Black Cherry

Wenge

Teak

### DID YOU KNOW?

CafeCountertop can provide any hardwood in constructions other than Euro-Star. Wenge, Zebrano, Teak, Hickory and Hard Maple are popular options.

## ULTRACLEAR WHITE OAK

Crisp and architectural, UltraClear White Oak is completely different from all other CafeCountertops® finishes. We create this product by combining first-quality American White Oak with a specially-formulated finish which preserves the pure natural color of White Oak. This finish is truly stunning and perfect for modern design, but please note that UltraClear White Oak does not contain antibacterial components.

## OUTDOOR WOODS

Designing for the al fresco lifestyle? Meet Terrace, the engineered wood countertop for outdoor applications. This material has proven itself in use as exterior cladding and decking across North America, and is now available in the correct thickness for countertops and furniture. Please be aware that the material may turn silver-grey over time if exposed to direct sunlight, and must be installed with stainless steel fasteners. Terrace's finish is UV-Resistant but not anti-bacterial, so we recommend that the homeowner should use a cutting board for food prep.

Terrace™

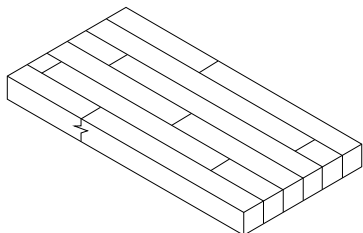

# CONSTRUCTION OPTIONS

## The Euro-Star Difference

Trees are living things. Raw hardwood lumber shrinks, swells, twists and splits in response to changes in moisture and climate. Euro-Star™ by CafeCountertops is the one product to turn to when you need a solid hardwood countertop that won't split, warp or otherwise fail and lead to callbacks. Considerably stronger than ordinary wood tops, this specialty construction is the best choice for today's massive kitchen islands. With Euro-Star, huge countertops are possible on quick lead times.

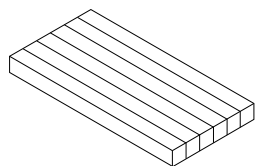

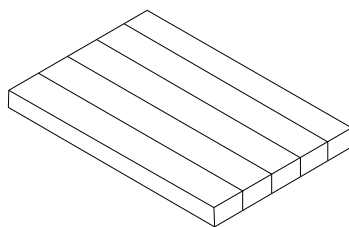

Euro-Star wood tops can be built and shipped as large as 8ft x 16ft 4in as a single piece, with no field joints.

### EURO-STAR

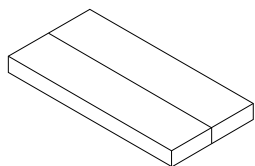

### EURO-PLANK

Consistent 3 1/2" planks

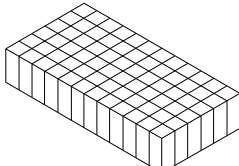

### CONTINUOUS STAVE

available in thicknesses up to 8"

### WIDE PLANK

variable width 5" - 8" planks

### END GRAIN

available in thicknesses up to 8"

WENGE END GRAIN

BLACK WALNUT CONTINUOUS-STAVE  
(specified with sapwood)

THICKNESS OPTIONS

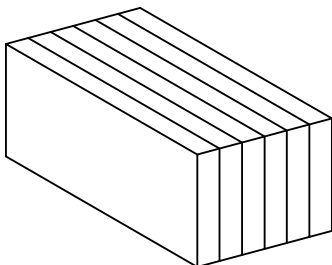

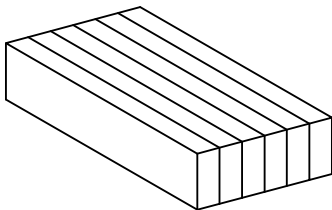

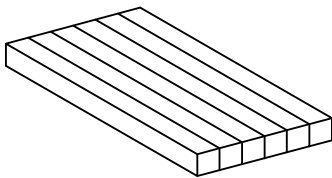

WIDE PLANK

Variable width  
5" - 8" planks.  
Thickness 40mm/1.58".

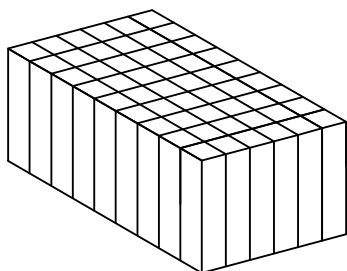

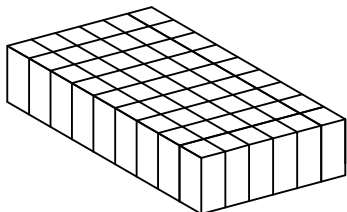

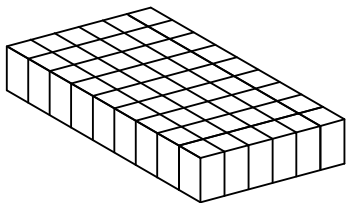

CONTINUOUS STAVE

Available in thicknesses from  
40mm/1.58" to 8".

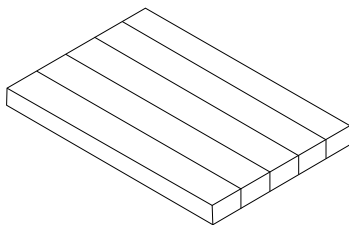

END GRAIN

Available in thicknesses from  
80mm/3.16" to 8".

EURO-PLANK

Consistent 3 1/2" planks.  
Thickness 40mm/1.58".

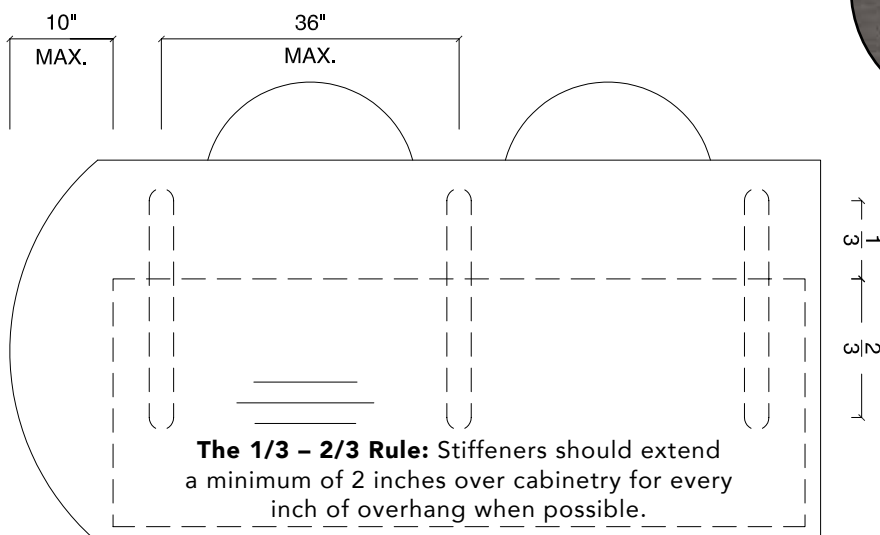

## MITER WATERFALL END PANELS

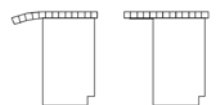

Miter Waterfall End Panels are a specialty of CafeCountertops. Concealed hardware tightly connects the miter joint.

## RECESSED STEEL STIFFENERS

Can be used to eliminate corbels or brackets, for extra strength at table tops, or to add rigidity to any countertop. Our engineers are happy to help. Just send us the layout and we will assist in planning.

**Overhang is a 10" max without supports.**

**AVOID THE "BARREL EFFECT"**  
Most overhangs require support to resist compression sag.

Our recessed steel support system is a great alternative to corbels or brackets.

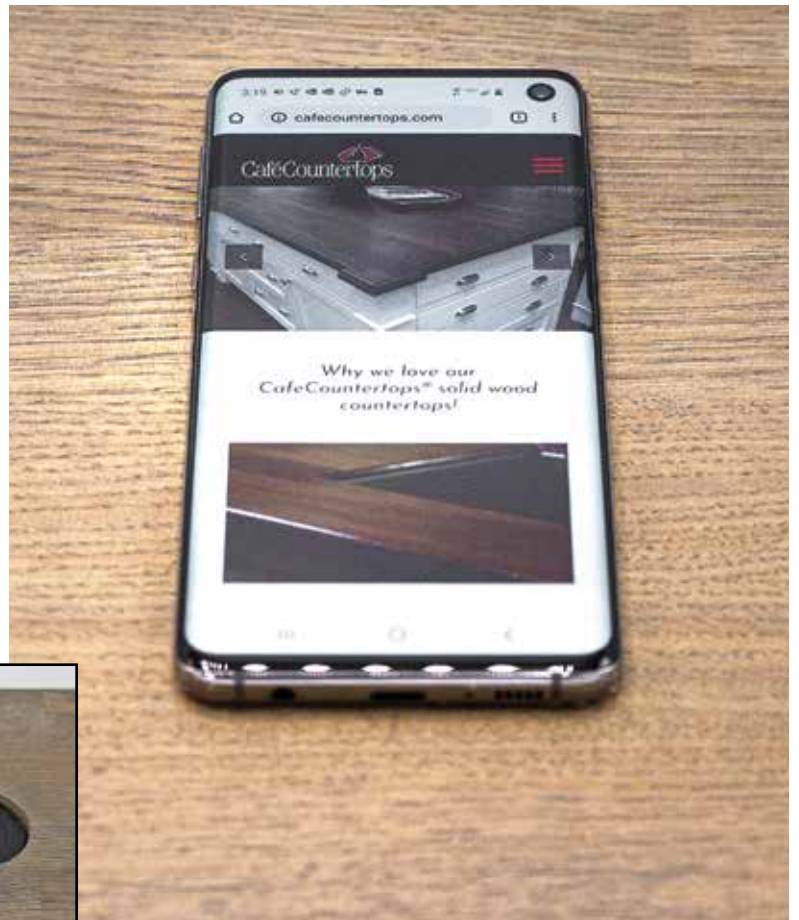

## A CONVENIENT PLACE

Who wouldn't like a designated place where they can always find their keys? Actually this custom-sized bowl is useful for storing anything, and can even be combined with our Wireless Phone Charger.

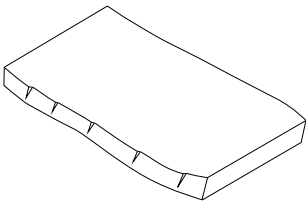

## NEW SUPERFAST WIRELESS PHONE CHARGER

Hidden in plain sight, underneath the countertop. 15 watts of Qi-technology charging will recharge your Apple or Samsung devices quickly (if Qi-compatible). The Superfast Wireless Phone Charger plugs into any standard 110V receptacle.

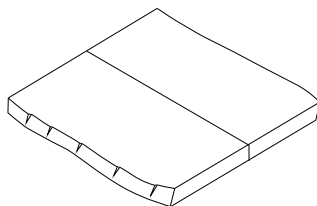

## LIVE EDGE SLABS - WE'RE GETTING BACK TO NATURE!

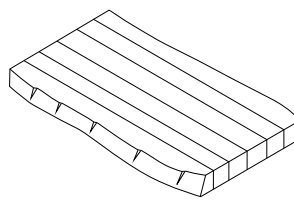

### SINGLE

True Live Edge, sawn from a single log. No seams or added pieces, just one massive, beautiful slice of a tree with natural Live Edge on both long edges.

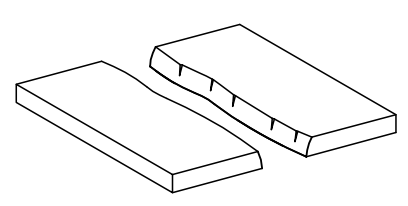

### DOUBLE

Two Single Live edge slabs are mated and joined to form one extra-wide Live Edge Countertop.

### PLANK

Plank-style Live Edge is made from smaller boards, permitting more efficient use of lumber. Only the two outer edges are Live Edge.

### RIVER

Two slabs with Live Edges facing inwards, Outer edges can be square or also Live Edge.

## STAIR SYSTEMS

CafeCountertops can provide you with custom Stair Treads, Risers and more, in any of our woods and finishes. Designers enjoy pairing the stair treads with matching countertops, shelves and mantels.

## COMMERCIAL SPACES

## RUSTICO SPECIALTY EDGE

Better than Reclaimed. The appeal of reclaimed lumber is undeniable, but it's important to remember that much reclaimed woods come from old barns and old factories, which are hardly food-safe environments.

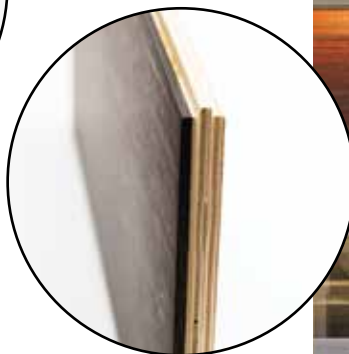

We've taken the style of a hand-hewn beam and made it our own. Now you can have that farmhouse style without the health hazards of reclaimed lumber. Rustico is a handcrafted detail that can be applied to any of CafeCountertops' woods and construction options. Shown here in Rustic Oak with optional distressing.

## FULL HEIGHT BACK SPLASH

Available in 19mm / 3/4" Euro-Star in select woods (see pg 4), and exclusively in Smoked Oak with CafeCountertops' new Wall Panel product, stocked in 100mm (4" approx.) and 200mm (8" approx.) planks.

19mm  
Euro-Star

Wall Panel  
(Smoked Oak only)

## EURO-SHELF — THE HEAVY DUTY FLOATING SHELF SYSTEM.

Our heavy-duty mounting rail allows for strong attachment at every stud. Adjustability allows the installer to level the shelf in a fraction of the time required by common floating shelf brackets. Most importantly, the shelves will be straight and level, in keeping with the quality of your work. Available in any length up to 16' 4".

SIMPLY BEAUTIFUL.

Depth: Maximum 12"; Thickness: Minimum 40mm. Available in all woods, construction options, and paint grade (unfinished beech).

## EURO TABLE SYSTEM —

Designed for use as a 4-leg table, or as a 2-leg extension to be installed at the end of an Island. Additional Table Legs and Steel Stiffeners can be added for additional support as needed.

Table legs are built from two layers of 40mm countertop material, to create 80mm x 80mm x custom-height table legs. Casters, levelers and custom leg shapes (e.g. Tapered) are possible. Larger leg sizes are possible if the metal hardware is hidden.

Clever locking hardware allows for quick, super-sturdy installation, and is available in:

Satin  
Black

Satin  
Bronze

Satin  
Nickel

Satin  
Gold

Polished  
Chrome

## NEW... EXTENDING MECHANISM OPTION FOR EURO TABLE!

(1) Pull out extending mechanism (2) Fold out leaves (3) secure legs and lock

## ROOM DIVIDING SHELF

*Open Sight Lines, Personal Space*

Not everyone is prepared to commit to Open Concept. This simple furniture element, fabricated from CafeCountertops' wood panels and with concealed connecting hardware, preserves the sightlines of Open Plan living while maintaining a certain amount of room delineation.

CafeCountertops' Room Dividing Shelf is fabricated to your custom specifications. Width, Depth, Height, and quantity and location of Dividers are entirely up to you, with only two constraints – The maximum length of any one component is 196", and the unit must be securely attached to avoid tipping accidents. Although shown in a floor-to-ceiling configuration here, any layout is possible, making the Room Dividing Shelf a versatile system that can be configured into furniture, built-ins, cubbies, lockers and any other application with a rectangular configuration.

CafeCountertops' Room Dividing Shelf ships flat-packed for simple clip-connect, on-site assembly.

26mm/1" wall thickness

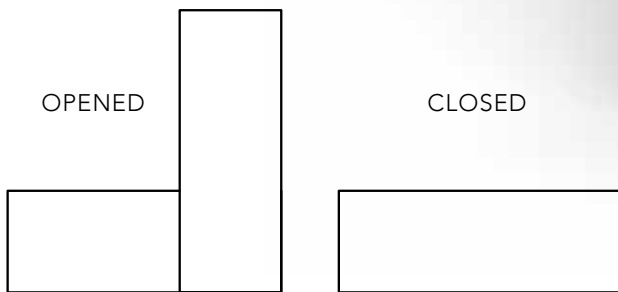

40mm/1.58" wall thickness

## THE PIVOT DESK

*For Spaces That Multi-Task*

Short on space? CafeCountertops' Pivot Desk sits neatly against the wall when closed, but can quickly and easily opened to create a functional L-Shaped desk. This space-saving solution is perfect for the home office.

## CUSTOM SHOP

*Challenge Accepted!*

CafeCountertops' team of skilled woodworkers are always up for a challenge. Your designs are fresh and innovative, and we have what it takes to make beautiful products come to life.

\* Type N Roman Ogee

\* Type Q Cove & Bead

Type R 1/4" Bevel Top & Bottom

Type T 1/2" Bevel

Type V 1/2" Cove

Type X Crisp Edge

\* Premium Edges

Custom edges available.

## WHAT IS VERS-CHEZ GROSJEAN?

It's a tiny village in Switzerland, about an hour north of Geneva, from which a young man emigrated to the United States in 1899 at the age of 15. It is located on the eastern shore of beautiful Lac de Joux, in the shadow of the Jura Mountains, just down the road from the famous Swiss watch factory where his father worked. Many of us at CafeCountertops are descendants of this young man, and today, these qualities define us - the precision and quality of a Swiss watch works, and the courage and drive to make our mark in America, the greatest manufacturing nation in the world.

Made in the United States of America.
