

EURO-SHELF — THE HEAVY DUTY FLOATING SHELF SYSTEM.

Our heavy-duty mounting rail allows for strong attachment at every stud. Adjustability allows the installer to level the shelf in a fraction of the time required by common floating shelf brackets. Most importantly, the shelves will be straight and level, in keeping with the quality of your work.

**30 LBS
PER SQ. FT.**

Depth: Minimum 7", Maximum 12"; Thickness: Minimum 40mm. Available in all woods, construction options, and paint grade (unfinished oak). Can be customized for recessed lighting, etc.
